Testing of Chloride Level of RDA Sea Sand Stockpile at Muthurajawela
(Report No. Mut/SS/CI/2006-1)

As per your request dated 05/10/2006 on the above we determined the chloride level of the above sea sand stockpile and results are sent herewith.

1. Sampling location : Disposing area
2. Sampling date : 14/10/2006
3. Number of locations : 02 (A and B)
4. Basis of sampling : At 1m. intervals from top to bottom of the stockpile
(i) Auger hole samples down to 5m. depth
(ii) Then freshly exposed vertical section down to bottom.
5. Sampling quantity : 10 samples from location A
15 samples from location B
6. Test done : Determination of water soluble chloride salts.
7. Test standard : BS 812 1988 (1:1 sand water extraction)
8. Weather condition : Rainy days
9. Results : Enclosed – Annex-I
